

Fujita Health University Hospital verification tests with Service Robot "AISLE Tower Type".

On Feb. 24th, 2021, Shintec Hozumi and Fujita Health University Hospital conducted medicinal transport verification test with "AISLE Tower Type".

With AISLE Tower Type handling medicinal transport, person to person contact is reduced while optimizing staff duties, and it contributes to operation service improvement.

AISLE Tower Type: Besides transporting items, it is a multi-use service robot in one unit, such as sanitization with UV irradiation and remote communications.

AISLE Tower Type which pulls dollies loaded with medicine and passes through automatic doors.

Shintec Hozumi participates in the "Aichi Robot Showcase" venture which is carried out in Aichi Prefecture, and promotes social implementation of service robots which will play a role in the "New Lifestyle".
