Launch of a new product "NN-1100" of the Smart mobile robot NEXT series

Shintec Hozumi Co., Ltd, launched a new product, the "NN-1100", of the Smart mobile robot NEXT series.

◆ NN-1100

Equipped with a lifter that lifts up to 1,000 kg by about 50 mm while being 155 mm thin. It can be used in a wide range of scenes because it can slip under and transport various types of dollies without modification.

In addition, it realizes smooth guide-less running that moves in all directions without stopping. (OPTION: magnetic tape method can be used together) Easy route changing, flexible and highly efficient transportation without waste.

Furthermore, we offer three types, long type (Type L), pallet type (Type P), and factory type (Type F), depending on the length of the item to be transported.

Shintec Hozumi Co., Ltd. proposes total solutions that improve productivity centered on robotics, by being closely involved with the customer's site regarding the logistics scene, such as factories and warehouses.
