

August 2021

～ Headquarters renovation work implementation ～

Shintec Hozumi Co., Ltd. has renovated its head office (Miyoshi City, Aichi Prefecture) as part of a renovation project.

[Renovation Project]

We are continuing to renovate our head office with the aim of creating an environment that can provide "comfort" to our customers and "ease of work" to our employees.

We are waiting for you to visit our office.

<Lobby>

We have created a warm space where customers who come and visit the showroom, etc., can spend time.

We use eco-friendly materials such as louver glass made from recycled waste fluorescent lamps and carpets made from used plastic bottles.

<Dx Room>

We have opened a dedicated space to promote Dx and work mainly on handling improvements at production sites.

For example, use smart glasses to share the field of vision with workers in distant factories, such as overseas.

We provide operational support for improvement work while observing the actual site in real time.

<Reception Room>

In order to increase the intake of natural light and welcome customers in a large and bright space, we changed the layout and transformed one part of a wall to incorporate a window.

[Address of Head Office]

5-3-1 Neura-Machi, Miyoshi City, Aichi Prefecture 470-0217, Japan
