## Interacting with students of Kyoto Municipal Saikyo High School

---

Shintec Hozumi Co., Ltd. was selected as a fieldwork destination for Kyoto Municipal Saikyo High School, and four students visited the company on October 12, 2021.

On the day of the event, we heightened the exchange through actual operations of our transport robots, group work to introduce the robots, and round table discussions with employees.

It was a day that energized the attitude of the students who drew their visions for the future and acted with curiosity.

We would like to express our deepest gratitude to the students, teachers, and Kyoto Municipal Saikyo High School for visiting us.
