

March 2022

"Transport Robot Practical Seminar" will be held regularly

From April 2022, Shintec Hozumi Co., Ltd. will hold a regular "practical seminar" for customers who have introduced our transfer robot.

By taking this course, everything from basic operations to inspections will be able to be carried out by customers.

Also, by understanding the mechanisms, the transport robots can be used more effectively.

Target

Customers who use the SS series and NN series

Lecture Course

- ① Basic Operation Course (SS/NN series)
- ② SS Series Maintenance Course
- ③ Tango (Track Type) Route Creation Course

Contents

Basic operation, periodic inspection method, sudden trouble handling method, teach creation method, etc.

Cost

Varies, pending on the course. For more details, please contact us.

Location

- ①: Shintec Hozumi Co., Ltd. Head Office (Miyoshi City, Aichi Prefecture)
- ②③: Held as a business trip seminar according to the customer's usage environment.
