AISLE Series

Newly announced "System that automatically changes the layout of furniture"

Shintec Hozumi Co., Ltd. Announces that has developed a new system that automatically changes furniture layout with the AISLE Series of multi-use service robot as one example of office robot applications.

In an office environment where flexible working styles are required, we will contribute to the realization of efficient and human working styles.

In addition, we will be exhibiting at the Oliver Corporation booth, which will be exhibited at the "9th Work-style Innovation EXPO" from May 11th (Wednesday).
