

April 2023

TANGO SERIES "T2m" "T3m" Sales Commencement

Shintec Hozumi Co., Ltd. will start selling the Transport Robot TANGO series "T2m" "T3m" starting from April.

It is the successor model of SILPS Tango, which has been requested by many customers for a long time, and it compatible so that replacement along with increased functionality are possible.

In addition, safety functions are also enhanced, contributing to automation, efficiency, and labor savings at production sites. We will continue to make further efforts to propose solutions and develop high value-added products so that we can be of service to our customers.

◆T2m/T3m

Transport Robot
TANGO Series

A smooth and efficient production line can be built utilizing forward/reverse and sideways movements.
