## Guide-less Transport Robot "TANGO2020" Sales commencement

With Guide-less Transport Robot "TANGO2020", transport is even smoother and even simpler.

Introduction to Shintec Hozumi Co., Ltd.'s Transport Robot "TANGO2020" series.

The outstanding travel performance up to now has not changed, and this time the "TANGO2020" series are all equipped with a guide-less system. The design has been completely changed.

### <Alternative for Conveyor System>

- Next generation production line that utilized Transport Robots.

Low ~ High speed travel and synchronized travel  
Realize production line flexibility.

<https://youtu.be/NsHK01XWrp4>

### <Production Line Flexibility>

- Flexible production line due to the Transport Robot Stop & Go

Parts supply and transport between processes due to continuous travel.  
Coexistence in facilities with humans and robots.

<https://youtu.be/vgbiHjXtEcc>

### <Unmanned product transport>

- Transport robot and dolly automatic coupling transport

Hand dollies already at hand can be used.  
Transport time is reduced and workability improves.
