[mesm Tokyo, Autograph Collection] Service Robot "AISLE" Introduction

Shintec Hozumi Co., Ltd.'s transport robot was introduced at the [mesm Tokyo, Autograph Collection] in order to optimize linen exchange duties enhance health standards.

■ Introduction Contents

Slipping underneath a dolly and towing

With the introduction of AISLE at the [mesm Tokyo, Autograph Collection], dolly transports with regards to exchange duties of linen, which are sheets, etc., were fully automated.

"Non-contact" as well as "Non-encounter" used linen transport is possible, and by accomplishing even more hygienic operations, it contributes to setting up an environment where guest that use the hotel can stay with even more safety and peace of mind.

In addition, it is valued for reduction in hotel staff work burden as well as a measure for resolving shortages of personnel.

From here on, we will strive so that it can be widely utilized on the "Transportation" scene.
