

## Representing the next generation transport robot concept model "NEXT". (3rd RoboDEX Nagoya)

Shintec Hozumi Co., Ltd. has begun introducing new value by means of robots that cooperate closely with people at the "3rd RoboDEX Nagoya -Robot Development & Application Expo Nagoya-".

<Concept movie for the next generation transport robot concept model "NEXT".>

We desire to create transport robots which pleases the customers even more. Our new challenges have begun.

<SMART FACTORY VISION>

Making large scale changes in the world of simple transport such as transporting from point A to point B, and realizing production systems that flexibly corresponds to the changes in products and production with the "NEXT" of the next generation transport robot concept model.

<OUR VISION OF SERVICE ROBOT>

A transport robot in which the design for integrating into those spaces was taken into consideration. Transport is possible without reforming dollies that are being used by customers by equipping lifters to the 130 mm ultra-low floor height compact package.
