

AISLE Tower Type Ultra Violet Light Irradiation by the Disinfection Function will be launched

Shintec Hozumi Co., Ltd.'s introduced a new option function to the service robot AISLE Tower Type.

AISLE Tower Type is a robot that can be utilized with 1 unit for multiple purposes with the necessary methods at the necessary time in public spaces such as hotels, offices, hospitals, schools, etc.

In addition to luggage transport by the main dolly towing function, a disinfection function by irradiating ultra violet light will be launched in January 2021.

Utilization Image at the hotel

Using UV-C waves (222 nm) which do not harm people's eyes or skin. By efficiently disinfecting without the presence of people, it contributes to environmental constructing where it is desired to live more safely with a peace of mind in the new normal livelihood during the Corona Virus pandemic.

Please consider making use of AISLE.
